Protective Relay/Power System Engineers

Electrical Engineers needed for commissioning, testing, troubleshooting and analysis of electrical power systems from 600V thru 115kV. Position requires thorough understanding of protective relaying applications as well as ability to commission and test relays, power transformers and switchgear. Some overnight travel, mostly in southern New England, is also required. BSEE plus 10 years experience or equivalent.

Field Service/Shop Technicians

Electro-mechanical Technicians needed for maintenance, testing, troubleshooting and analysis of electrical power distribution equipment. Position involves repair and overhaul of power circuit breakers and related equipment in a shop environment as well as on-site maintenance and testing of power systems in industrial facilities. Frequent overtime and some overnight travel, mostly in southern New England, is also required. ASEE, ASME or equivalent experience a plus. Strong mechanical aptitude necessary.

Phasor Engineering Services is committed to providing a work environment free from harassment, intimidation and coercion based on or related to race, sex, religion, national origin, age, disability or any other classification protected by law.
