### **Relay Technician / Field Service Engineer (CT and ME)**

Engineers needed to participate and lead in the testing, troubleshooting and analysis of electrical power systems from 600V thru 115kV. Position requires both office and field (hands-on) involvement in power distribution equipment, especially protective relays. Candidate will also manage small to medium sized projects, develop drawings as needed and support field maintenance crews during outages. Some overnight travel required, mostly in southern New England. Frequent (paid) overtime also required. BSEE preferred, but equivalent related experience will be considered. Salary commensurate with education and experience.

*Phasor Engineering Services is committed to providing a work environment free from harassment, intimidation and coercion based on or related to race, sex, religion, national origin, age, disability or any other classification protected by law.*
